

LONG TERM EVOLUTION (LTE)

Welcome to the home of 4G LTE

4G LTE is the technology to allow you to Live The Experience. Your smart devices will run better, your apps work faster and your entire mobile experience will be like nothing before.

bmobile is the only network in Trinidad & Tobago to offer 4G LTE technology to mobile, residential and corporate customers. That's why we are THE 4G LTE network.

At launch we covered the most populated and travelled parts of Trinidad & Tobago so that as many people as possible are able to experience the excitement of ultra fast 4G LTE. Then soon after, we'll begin to roll out more and more places across Trinidad and Tobago.

bmobile LTE offers at peak, download speed of up to 60 Mbps and upload speeds of up to 24Mbps. bmobile LTE offers 6Mbps on the low end which is more than enough to seamlessly stream videos and this is still 3 times better than previous speeds.

CUSTOMER BENEFITS
